Thurn, H.
NUCLEAR RESONANCE MEASUREMENTS WITH POLYETHYLENE. [1962] [48]p. 52 refs.
Order from SLA $4.60 62-18649

Trans. of Kolloid Zeitschrift (West Germany) 1961, v. 179 [no. 1] p. 11-29.

DESCRIPTORS: *Polyethylene plastics, Crystallization, Molecular structure, *Nuclear resonance, Absorption spectrum, *Resonance absorption.

The temperature curves of half-widths, immobile fractions, 2nd moment, 4th moment and (4th moment) $^{1/4}$/(2nd moment) $^{1/2}$ were determined for different polyethylenes as a function of the degree of branching and of the limiting viscosity. Results are discussed. In the case of linear and branched polyethylenes crystallized from a xylene solution, the molecular mobility is strongly inhibited in the amorphous regions compared to a sample which had been crystallized from a melt. (Author)
